JOIN US for an intensive one-day workshop that will introduce you to quality control protocols to achieving a quality end product for reclaimed asphalt shingles (RAS) used in asphalt applications!

This intensive one-day workshop will provide participants with hands-on learning about the specifics of creating and implementing an asphalt shingle recycling program and operations for end market use of RAS in asphalt applications. The goal of the workshop is to bring industry and public partners together to discuss roles and responsibilities in implementing quality control and quality assurance to achieve a quality end product from the roofs to the road!

WHEN AND WHERE

April 26, 2011
8:00 a.m. – 4:00 p.m.
Colorado Department of Transportation
Headquarters Auditorium
4201 East Arkansas Avenue
Denver, Colorado 80222

TOPICS COVERED

The workshop will be specific to post-consumer asphalt shingle recycling. Participants will hear directly from public and private sector experts on environmental and technical requirements. Share in open discussions on shingle recycling operations, development of asphalt mix designs, preparation of samples prior to mixing and compaction, various methods for plant site stockpiling and handling and MORE!

Speaker and panelists will include partners from the roofing, recycling and asphalt industries, along with environmental and transportation agency officials.

REGISTRATION

Government Officials: FREE
Non-Governmental Participants: $25.00

Registration required
