ACCESS MANAGEMENT GUIDEBOOK FOR MAJOR ARTERIAL INTERSECTIONS

This guidebook is designed to help staff from the Iowa Department of Transportation (Iowa DOT), metropolitan and regional planning agencies, and other organizations both plan and design projects using effective access management techniques. This material will also assist those educating local commercial and governmental stakeholders about the importance of effective access management.

This document was prepared by the Institute for Transportation (InTrans) at Iowa State University. It was funded by the Iowa DOT. The authors greatly appreciate the support and advice provided by the Iowa DOT and members of the project advisory committee.
